

ITALIAN MADRIGALS

Many English consort manuscripts include Italian madrigals, both texted and untexted. Alfred Einstein's pioneering study *The Italian Madrigal* (Princeton, 1949) was followed by Joseph Kerman's *The Elizabethan Madrigal* (MADRIGAL-K). More recently two important works are ITAL-ENG H1: Lydia Hamessley, *The Reception of the Italian Madrigal in England: A Repertorial Study of Manuscript Anthologies, ca. 1580-1620* (unpublished diss. University of Minnesota, 1989) and ITAL-ENG B: Derry Bertenshaw: *The influence of the late 16th century Italian polyphonic madrigal on the English viol consort, c.1600-45: a background study*, (unpublished Ph D thesis, Leicester, 1992), together with spin-off articles ITAL-ENG H2 and ITAL-ENG-B2. The considerable presence of Italian madrigals within consort manuscripts makes it sensible that they should be noted in this Index. Few manuscripts of exclusively vocal music (such as those in the Madrigal Society collection) are included. Lute book versions are excluded too. I leave aside the argument as to whether the madrigals were played, or sung, or played and sung from these books. The decades immediately before and after 1600 saw the most copying of Italian madrigals, particularly from the printed collections and including English versions from e.g. *Musica Transalpina*, *Italian Madrigals Englished* and Morley's *Selected Madrigals*. Thereafter they declined gradually, but were not extinguished from the sources until the advent of the Civil War. (There are later purely vocal collections.)

English prints are identified as:
