

*Handwritten title: This Tuning. Bag-pipe way.*

Remember to strike these to be linked together in one combined motion of the Bow: shake your right hand in y<sup>e</sup> motion evenly and steadily as if you were straining the Bow on the strings: for so it will go more sweetly in this Tuning: and this Tuning doth require many Notes to be strook in one Bow for the most parte, to make it sweet.

# This mark denotes a Rollish which ever you see it put: A Rollish is the nimble moving of a Finger on a string as a bow to make the sound with a better to the ear.
